

As the Director of a non-profit trade association, I am opposed to any requirement the FCC may issue that we obtain written consent from our membership to allow us to FAX any kind of information that pertains EXCLUSIVELY to our MEMBERS. We are in favor of limiting UNSOLICITED faxes -- NOT information to those businesses that are MEMBERS of our NON-PROFIT TRADE ASSOCIATION. I would be opposed to requiring any NON-PROFIT from obtaining such written consent. We only Fax to our MEMBERS information that impacts their businesses as it pertains to their MEMBERSHIP. We do not believe that the intent of the law is to obtain written consent from MEMBERS of a non-profit association and we would respectfully request that that requirement be removed from this regulation. In addition, we do not believe that the FCC should require that our National Association, to which we are an affiliated organization, should be required to get written consent from our local association. In short, we believe the FCC should exempt non-profit associations from obtaining written consent from those parties that support the NON-PROFIT and from those parties that are MEMBERS of the Non-Profit. Thank you.
